

EGUARDIAN™

DOPE.
SECURITY

Elevating Cybersecurity with Fly-Direct Technology

Why Dope.Security Stands Out

- ✔ **Blazing Fast Speeds:** 4X faster performance by removing backhauling through data centers.
- ✔ **Unmatched Privacy:** Your data never leaves your device. Full security without exposure.
- ✔ **Always Reliable:** Even during outages, policies remain active and enforced on the device.
- ✔ **Simple & Intuitive:** Designed to work like a consumer app—easy to set up, deploy, and manage.

Meet Dope.Security

The world's first Fly-Direct Secure Web Gateway (SWG). Say goodbye to outdated, slow, and unreliable legacy security methods. Dope.Security delivers speed, reliability, and privacy by performing all security checks directly on the user's device – no stopover data centers needed.

Key Features

Local SSL Inspection

Faster and safer. Inspect encrypted traffic directly on the device.

URL Filtering & Cloud App Control

Block or allow websites and apps in real time.

Integrated Analytics

Actionable insights on productivity, shadow IT, and policy violations.

Advanced Anti-Malware

Proactively blocks malicious threats with intelligent caching.

Who Benefits?

Perfect for industries where speed, privacy, and uptime matter most:

Banking & Finance

Technology

Healthcare

Industrial & Manufacturing

Travel & Hospitality

Dope.Security at a Glance

Features	Dope.Security	Legacy SWGs
Data Center Dependence	None - Fly-Direct architecture	High - Stopover required
Speed	4X faster (no backhauling)	Slower (data center hops)
SSL Inspection	On-device	Centralized data centers
Policy Updates	Instant (seconds)	Delayed (30-60 mins)
Privacy	Fully private	Data exposure risks

Key Use Cases

Enhance Data Security

Powered by AI-driven CASB Neural, protect sensitive data like PII, PCI, and PHI with fewer false positives and instant insights.

Shadow IT Discovery

Gain visibility into unauthorized apps and control unsanctioned activity, preventing data leaks and compliance risks.

Boost Productivity

Monitor workforce activity with actionable analytics and refine policies to maximize efficiency.

Block Threats Proactively

Advanced malware detection protects endpoints in real time, even without internet access.

What Sets Dope.Security Apart?

Intuitive Deployment

15-minute setup. No hardware.

Unified Management

All-in-one console for SWG and CASB policies.

Always Secure

Policies are cached locally, ensuring protection even during outages.

Technical Specifications

Unified Management

Windows 10/11, macOS 12+

Lightweight Agent

Minimal resource use (<100 MB RAM).

Deployment Model

Cloud-managed, endpoint-driven.

Analytics

Real-time insights and 7-day trend tracking.
