MORPHISEC

# MORPHISEC ANTI-RANSOMWARE ASSURANCE SUITE

*6-month ransomware-free guarantee or money back*

- ✓ **Adaptive Exposure Management:** Continuously assesses and prioritizes vulnerabilities, automates security control validation, and addresses misconfigurations to reduce attack surface exposure.
- ✓ **Ransomware Infiltration Protection:** Uses patented Automated Moving Target Defense (AMTD) technology to constantly change system configurations, making it nearly impossible for attackers to exploit vulnerabilities.
- ✓ **Ransomware Impact Protection:** Safeguards critical assets and files during an attack, minimizing recovery time and damage impact.

## Why Morphisec?

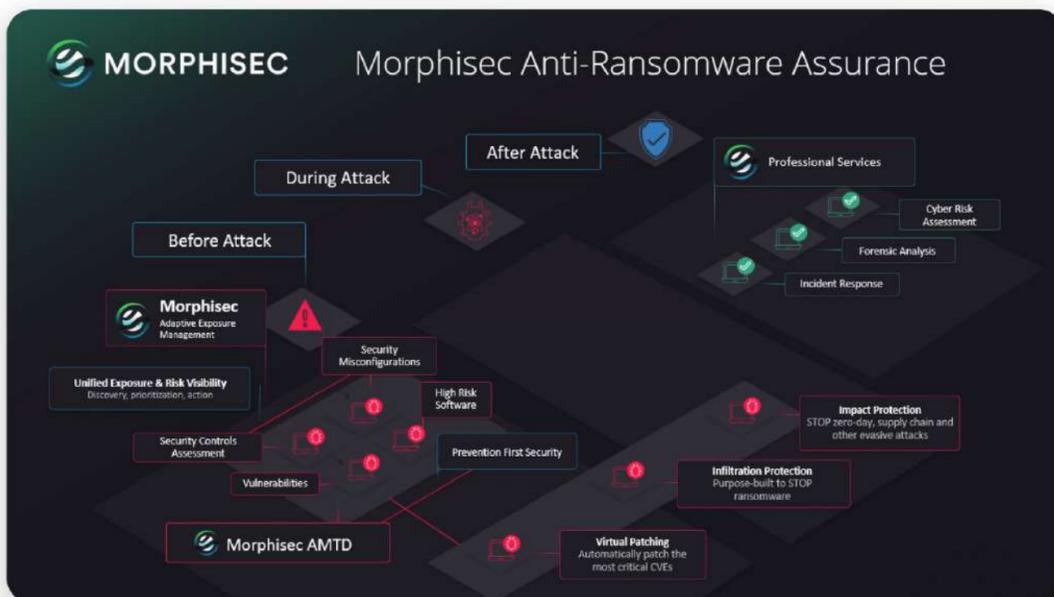

Morphisec's Anti-Ransomware Assurance Suite delivers multi-layered, proactive protection that stops ransomware attacks before they execute, ensuring your organization stays secure and operational.

**#1** trusted anti-ransomware protection provider

★ 4.8 on Gartner

★ 4.6 on G2

★ 4.6 on PeerSpot

## Assurance You Can Trust

Morphisec offers a **6-month ransomware-free guarantee**: if ransomware breaches occur despite full deployment, customers get a full subscription refund plus expert incident response support. This unique assurance reflects Morphisec's confidence in its prevention-first technology and commitment to your security.

## How Morphisec Protects You

| Features                                       | Benefit  | Impact   |
|--|--|--|
| Automated Moving Target Defense (AMTD)         | Constantly shifts attack surface to block ransomware infiltration and execution  | Prevents exploitation of vulnerabilities before they can be used   |
| Memory & Credential Protection                 | Blocks fileless attacks and credential theft attempts                            | Stops advanced ransomware and lateral movement tools like Mimikatz |
| Privilege Escalation & Hacking Tool Protection | Prevents attackers from gaining elevated access and using hacking tools          | Reduces risk of persistent access and further compromise           |
| Adaptive Exposure Management                   | Identifies and prioritizes vulnerabilities, shadow IT, and misconfigurations     | Improves security posture and reduces attack surface               |
| Operational Readiness & Cost Efficiency        | Minimizes attack dwell time and recovery efforts, reduces false positives by 90% | Saves up to 30% in security costs and 65% in investigation time    |

## The Morphisec Advantage

### Prevention-First Approach:

Stops ransomware at every stage, unlike reactive solutions that detect after infection.

### Enhanced Visibility:

Illuminates hidden risks and shadow IT to proactively manage exposures.

### Reduced Total Cost of Ownership:

Saves resources by eliminating the need for constant patching and lengthy incident responses.

### Improved Compliance & Cyber Insurance:

Boosts audit scores and reduces premiums through strengthened security posture.

### Expert Incident Response:

Included in the 6-month guarantee to help contain and remediate breaches swiftly.

## Market Proven

Trusted by  
**7,000+**  
Companies

Deployed across
